

Executing Digital Transformation for Efficient & Profitable Plant Performance.

Your Trusted Partner in
Digital Transformation
of Plant Operations

Unifying operational data across your organization into one intelligent platform that accelerates Industry 4.0 and operational excellence

Pragathi Process Informatics Platform

Pragathi Process Informatics application systems are designed around ISA 95 (International Society of Automation) levels and Industry 4.0 principles, ensuring interoperable, future-ready integration from field and control systems up to MES and enterprise.

This standards-driven approach reduces integration risk, simplifies IT/OT convergence, and protects your investments as plants evolve toward more autonomous, data-driven operations

Sustainable Growth and Freedom Through Ingenuity

Digital Transformation based International Society of Automation (ISA -95) standard for Enterprise-Control System Integration

ChatPlant
NextGen Industrial AI System

ChatPlant™ The Next Gen Industrial AI - A secure, plant specific AI that answers natural language queries on tags, batches, alarms, and deviations using live data from all Pragathi solutions and your legacy systems. It autonomously detects and alerts on anomalies to speed up root cause identification and enable safer, more confident decisions, built only on your data, not a one-size-fits-all chatbot.

Achieve six dimensions of enterprise value

- ✓ Improved profitability through better asset utilization.
- ✓ Data-driven operational excellence to maximize OEE.
- ✓ Enabling proactive prevention of quality, safety, and reliability risks.
- ✓ Consistent execution independent of individual expertise.
- ✓ End-to-end compliance and traceability.
- ✓ Progressive modernization aligned to ISA-95 and Industry 4.0

CUSTOMER TESTIMONIAL:

"Pragathi Centura22 Frontline Management System, Virtual Process Plant (VPP) and AI-readable Smart Piping and Instrumentation Diagrams have immensely supported in improving our Overall Equipment Effectiveness (OEE), team collaboration and Profitability."
